   - Learning Objectives
2. Binding WhatsApp
3. Conversation Interaction

1. Course Content

> **Note**
>
> - WhatsApp is suitable for international users; users in China are recommended to use WeChat, Feishu, and other mobile communication channels.

Course Overview

- WhatsApp is one of the mobile chat interaction methods supported by OpenClaw. After binding the WhatsApp channel, users can chat with the robot anytime and anywhere through their mobile phone
- Supports sending text and voice messages to control the robot, suitable for international users
- Combined with the Robot-Control plugin, you can remotely control the robot to perform various tasks via WhatsApp

Learning Objectives

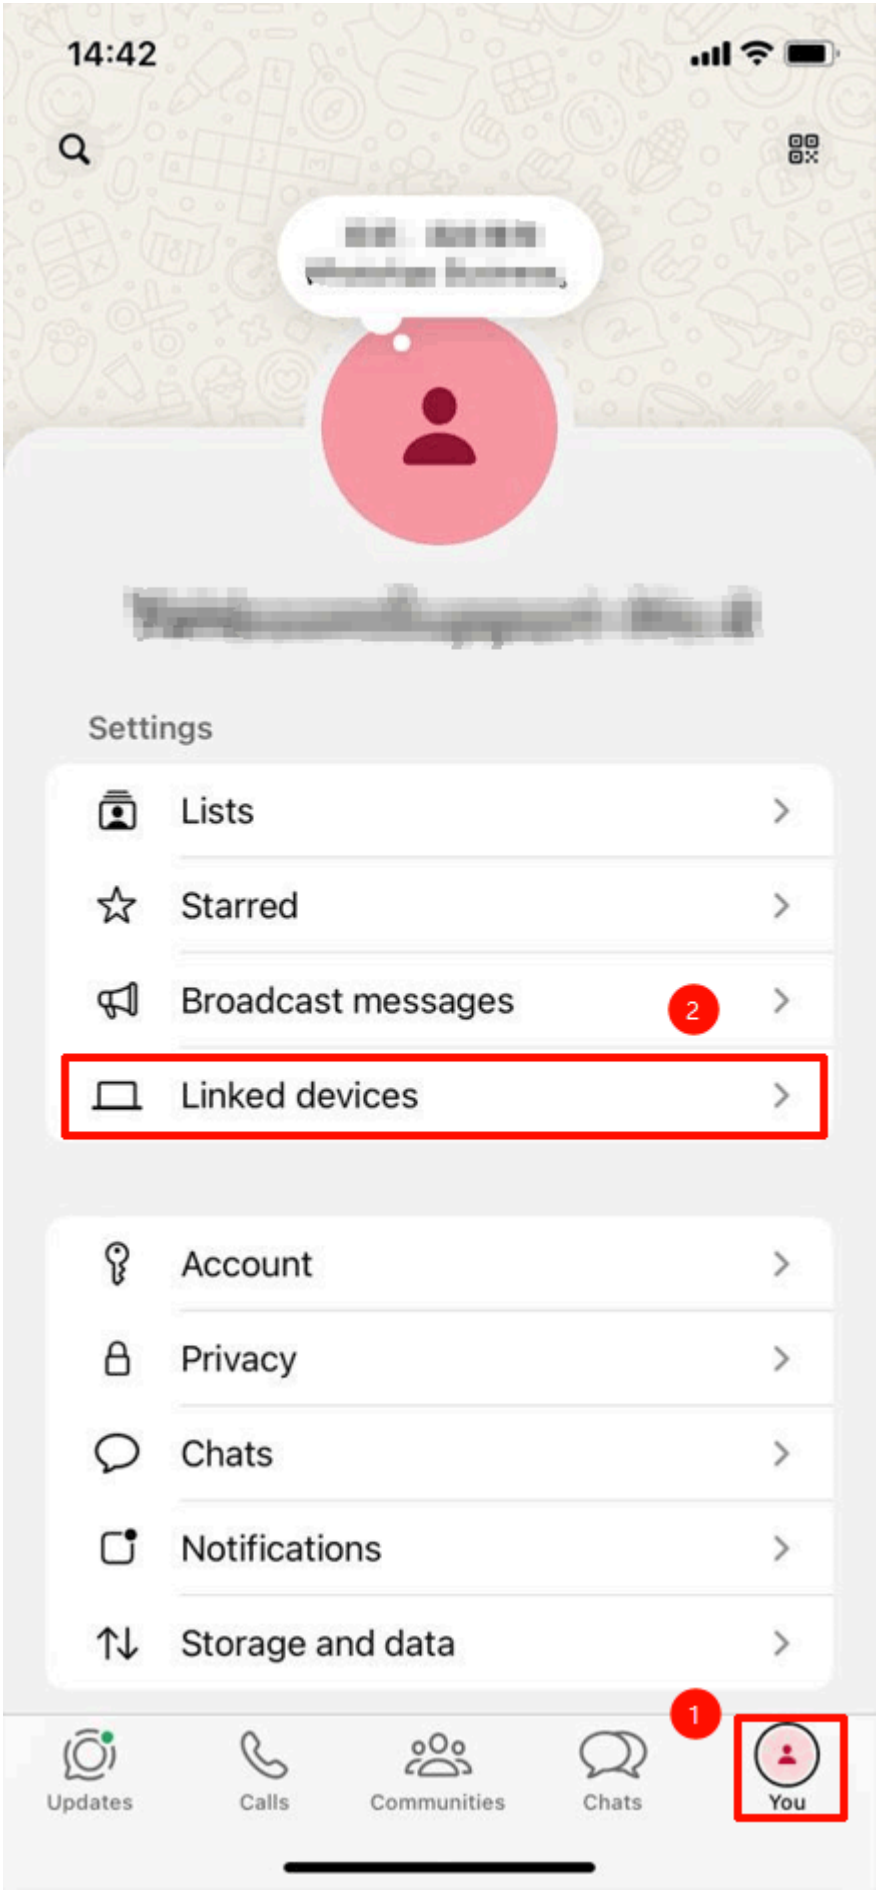

1. Learn to bind the WhatsApp channel and complete device association by scanning a QR code
2. Master the method to configure the WhatsApp receiving number in OpenClaw WebChat
3. Be able to conduct text conversation interactions with the robot via WhatsApp

2. Binding WhatsApp

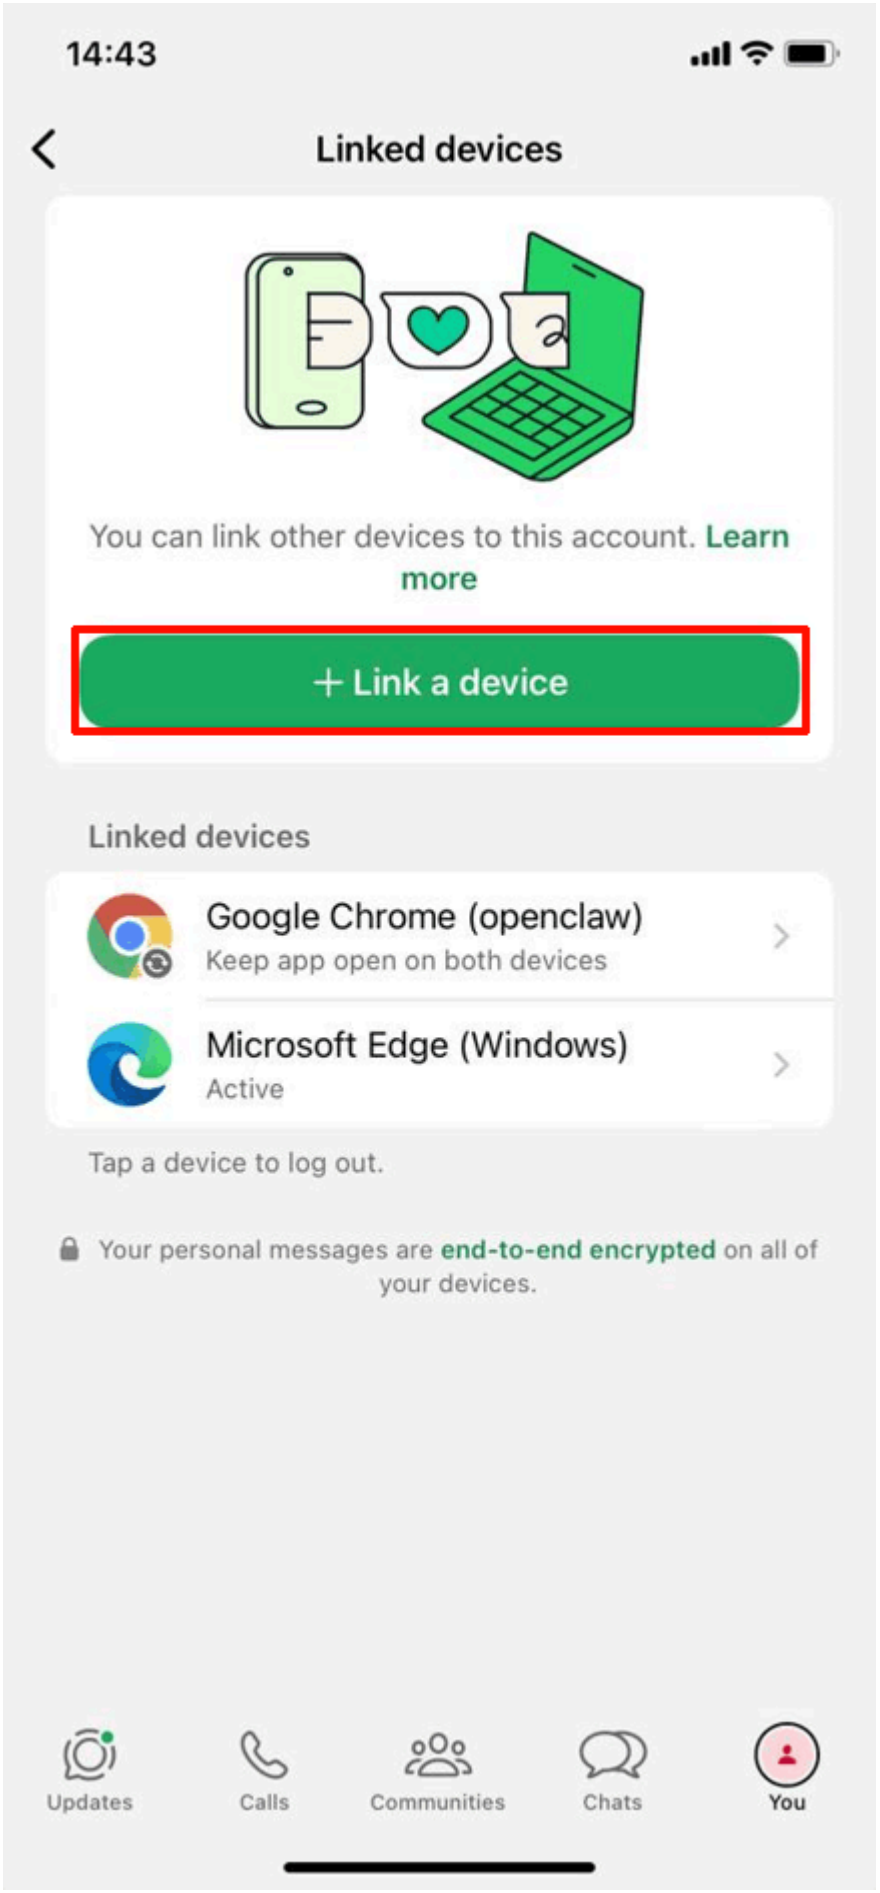

- Enter in terminal:

```
openclaw channels login --channel whatsapp
```

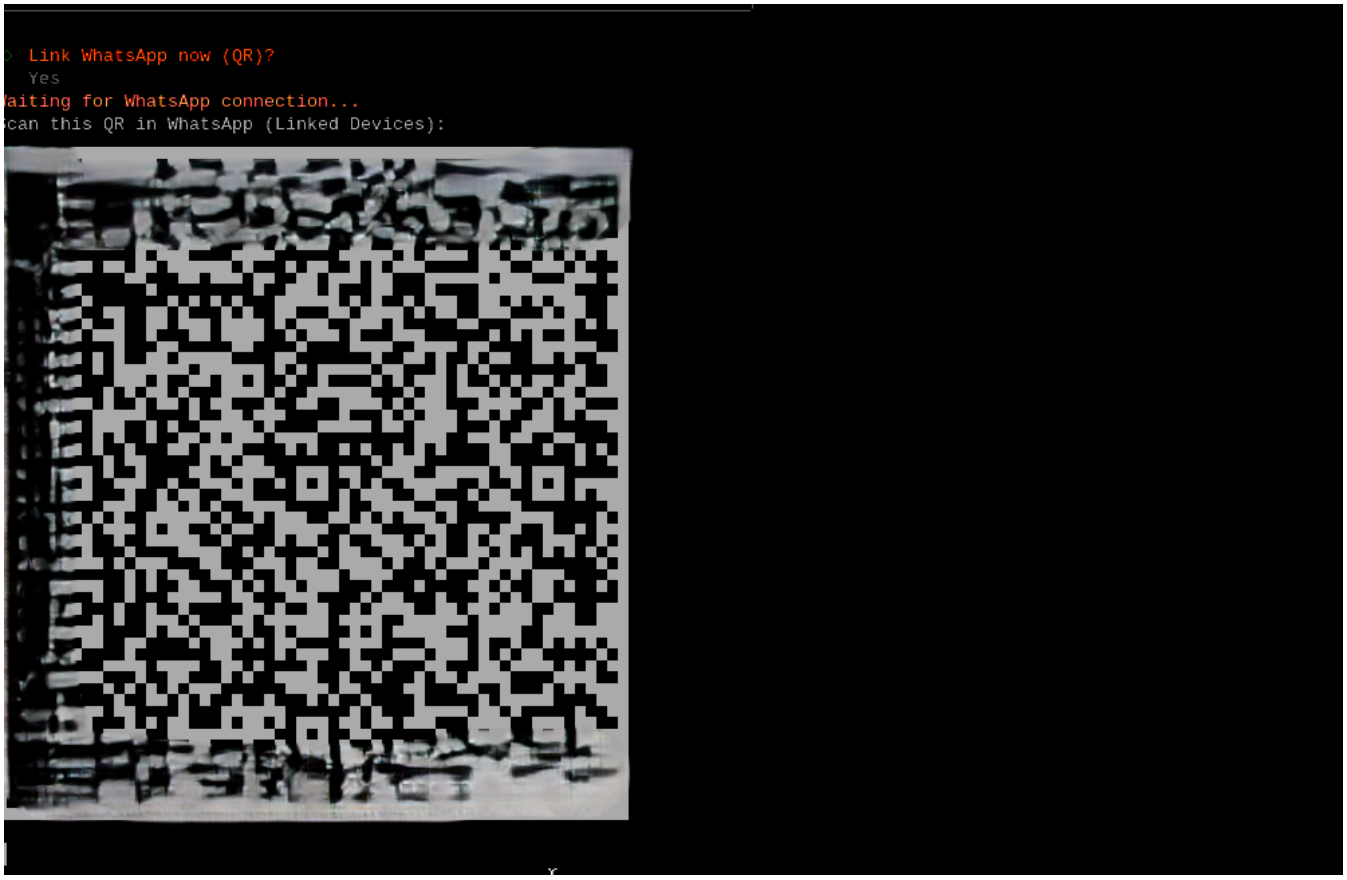

- Open WhatsApp on your phone, tap your profile → Linked Devices

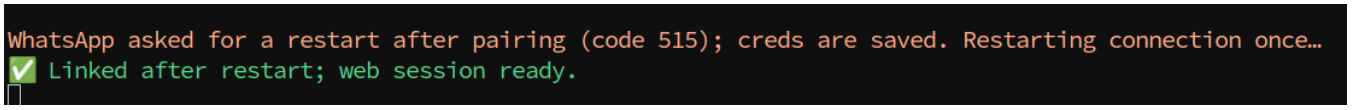

- Tap "Link New Device", then scan the OpenClaw QR code

- Scan the QR code with your phone to connect

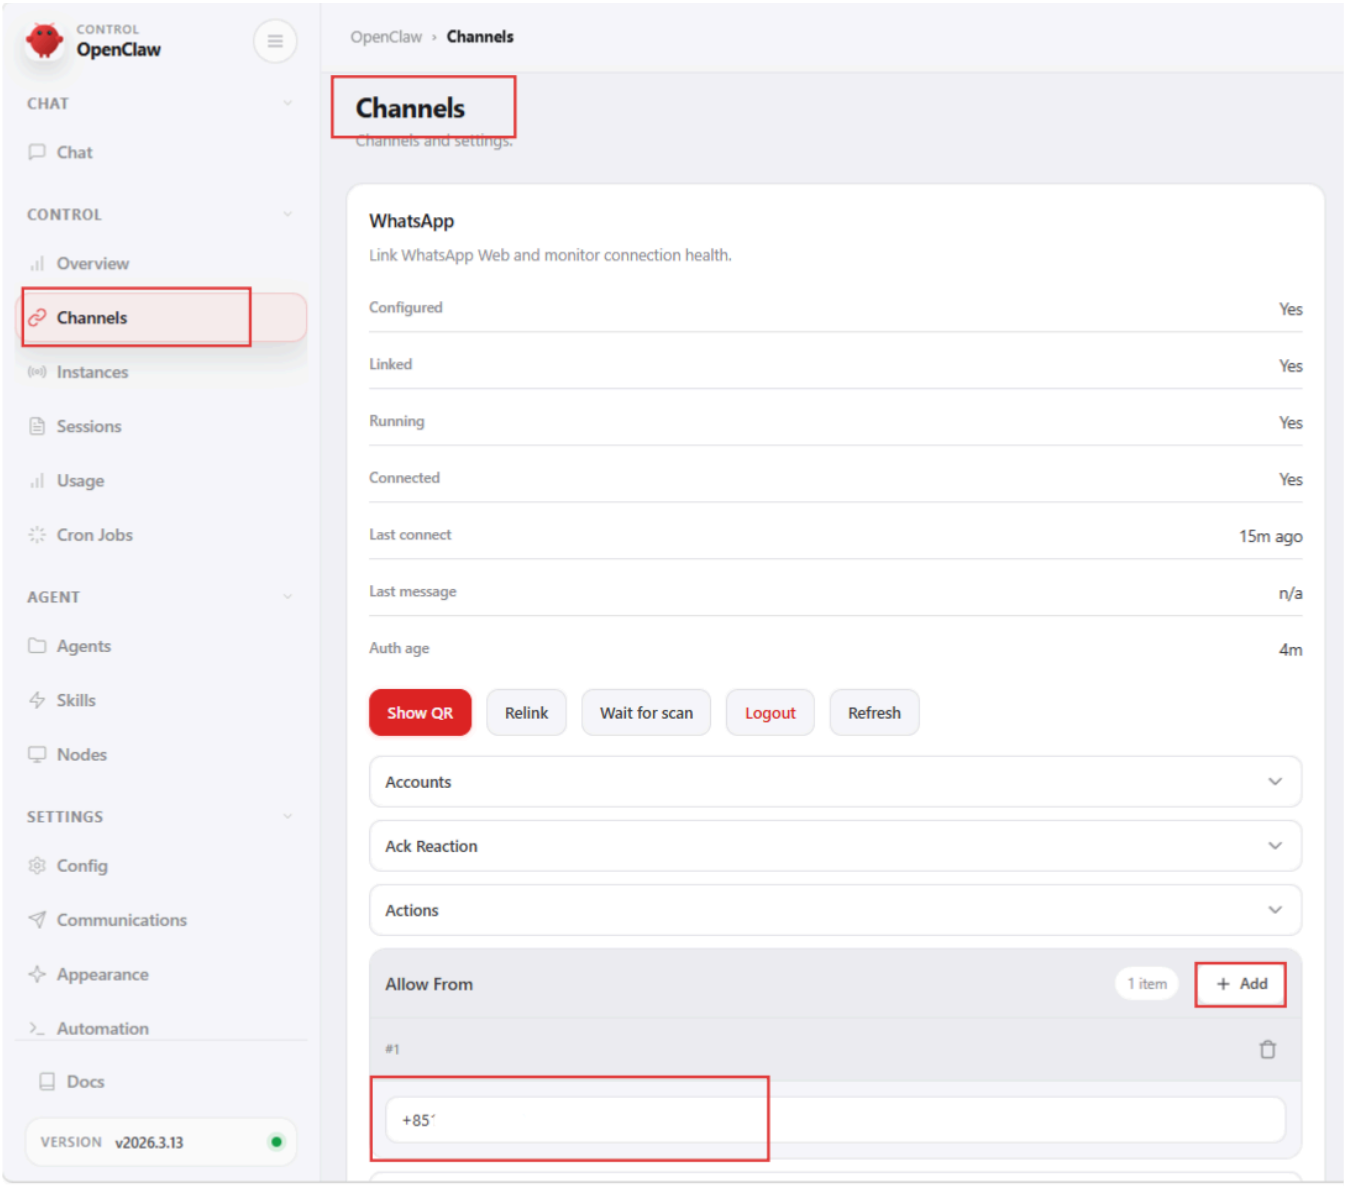

- When "Linked after restart" appears, the connection is successful

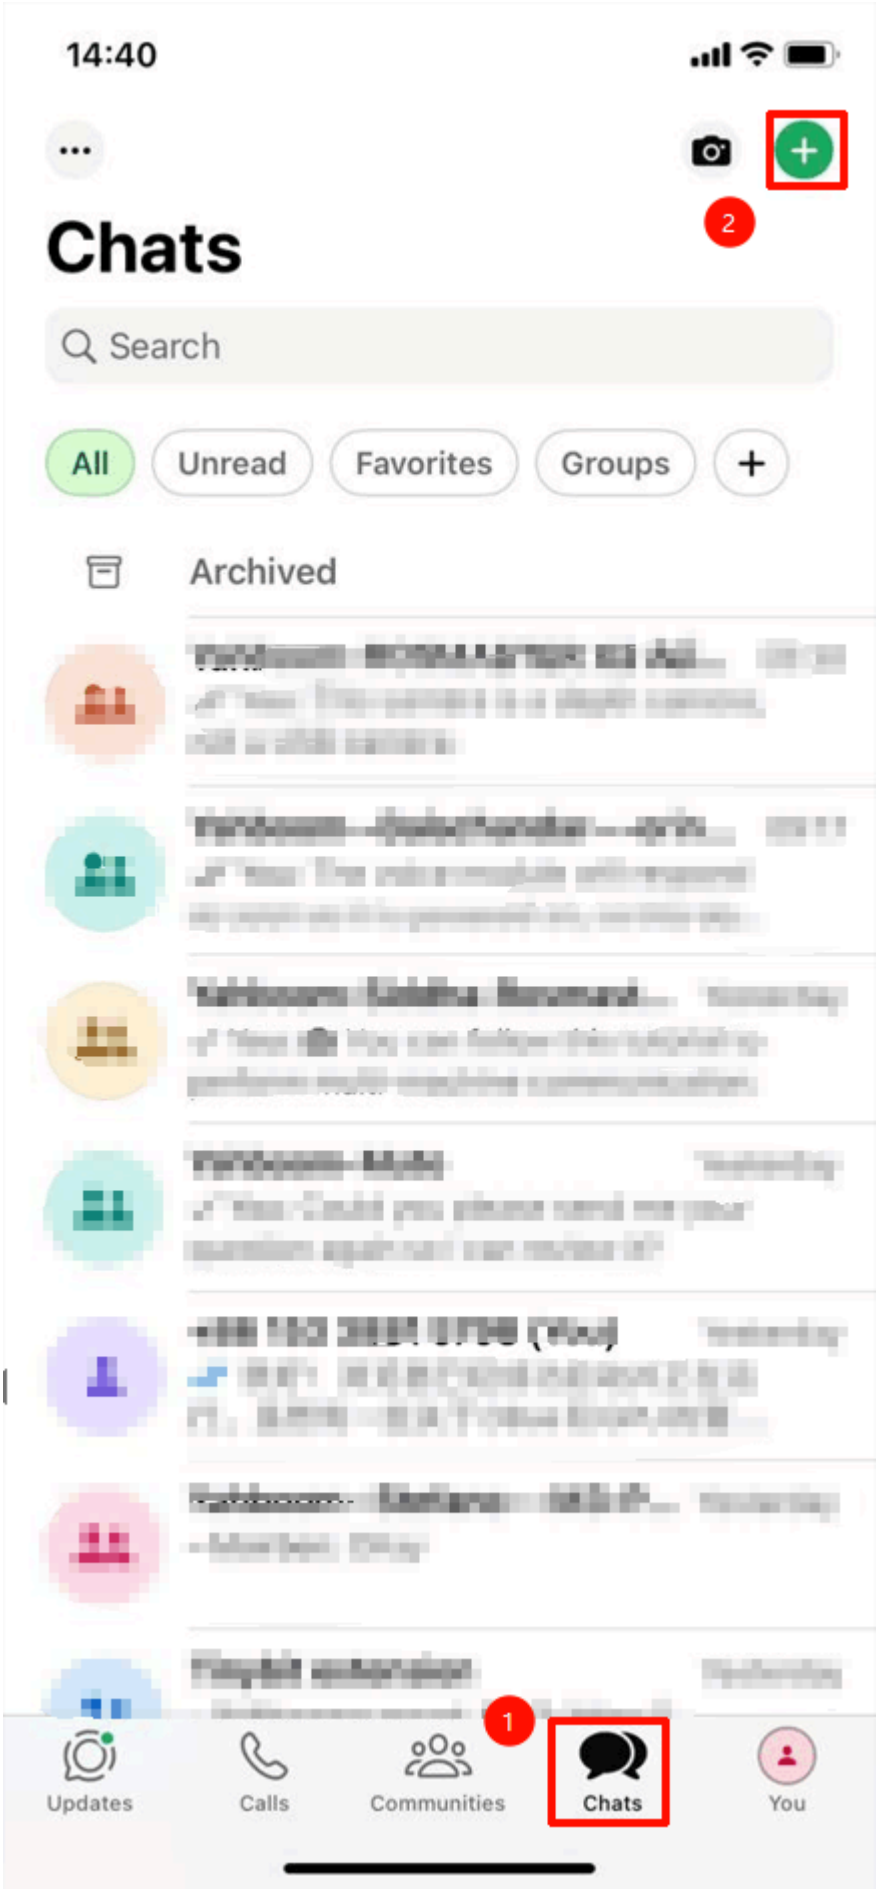

- Restart OpenClaw Gateway

```
openclaw gateway restart
```

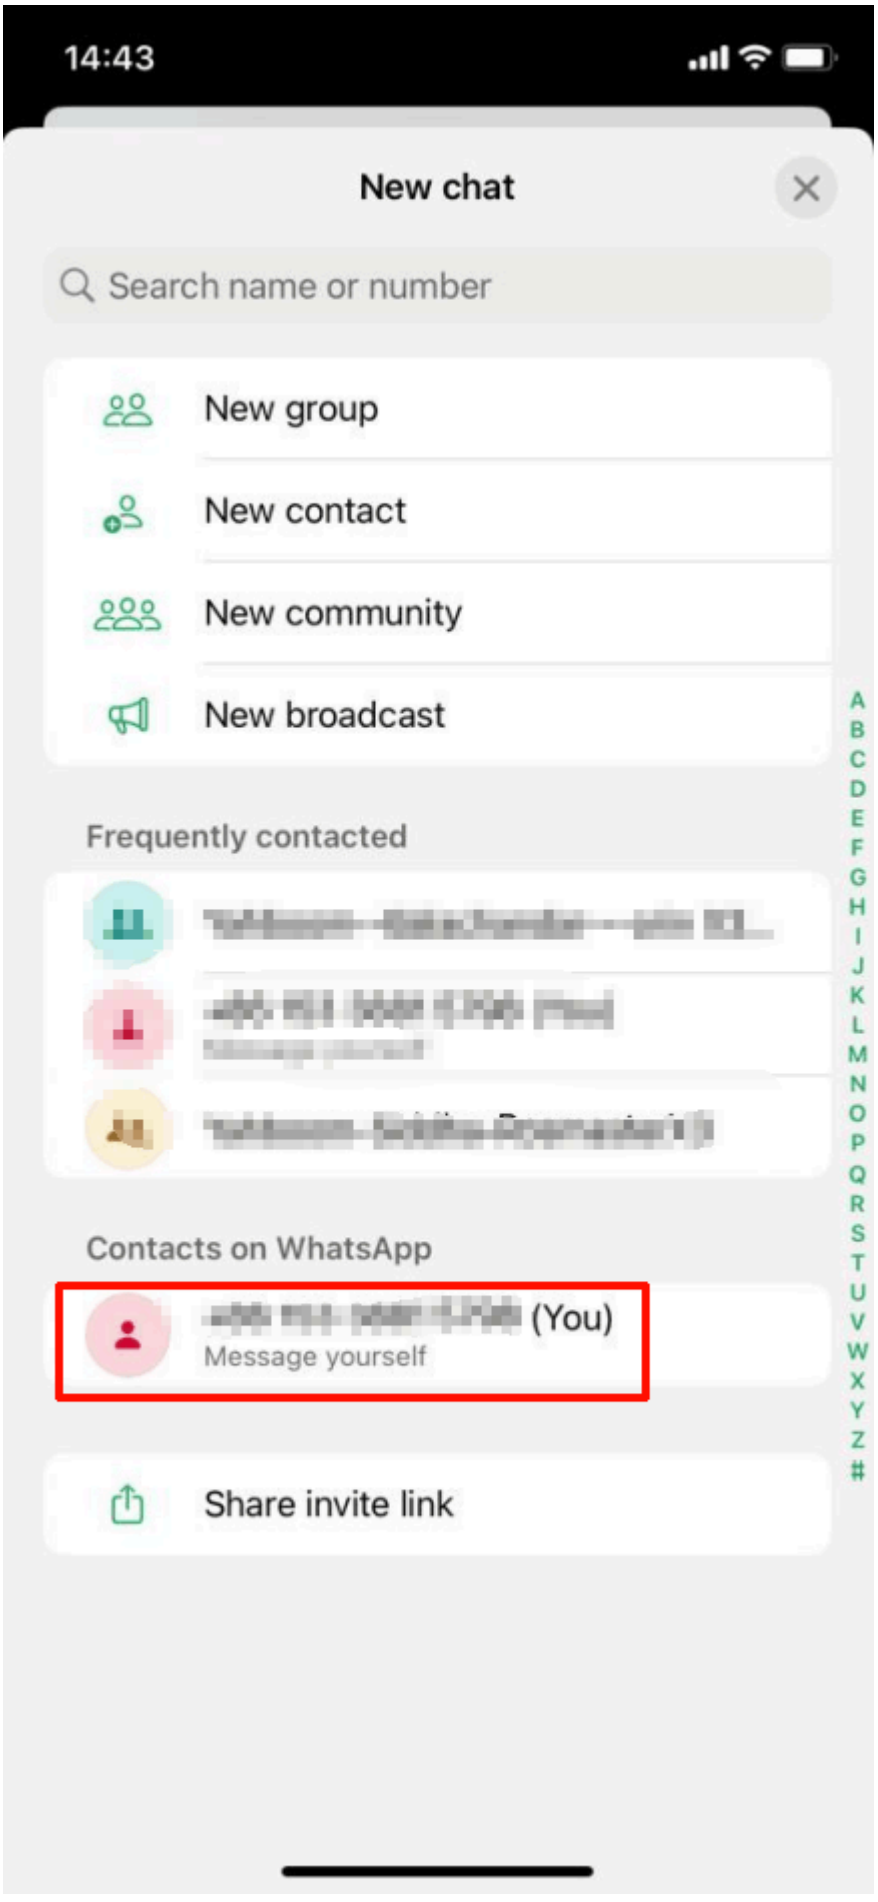

- Open the OpenClaw WebChat page
    - For how to open it, refer to 【01-openclaw webchat interaction】
- Click Channels → WhatsApp → Allow Form → + Add
    - Enter your phone number, configuration complete
