Custom Wake-up Response

Custom Wake-up Response
1. Course Content
2. Preparing Audio Files
3. Loading Audio Files

1. Course Content

- By adding audio files to the multi_brains program's audio library, you can customize the voice reply after wake-up.

> **Note**
>
> - This tutorial section is only for reference for users who need to customize a personalized voice reply; it does not affect normal use.
> - If you do not need a custom personalized reply voice, you can skip this section.

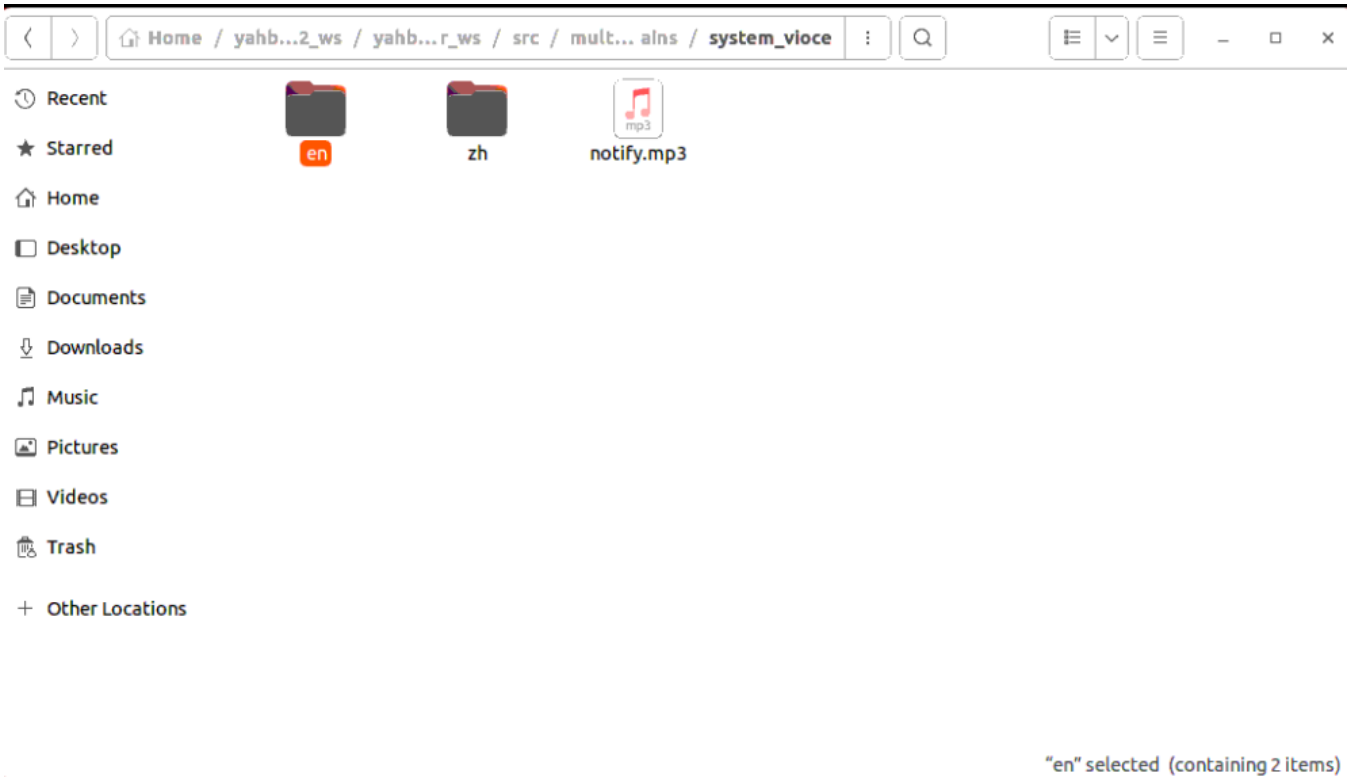

2. Preparing Audio Files

- Here, the **audio material** for the voice reply can be **downloaded and prepared by yourself**.

3. Loading Audio Files

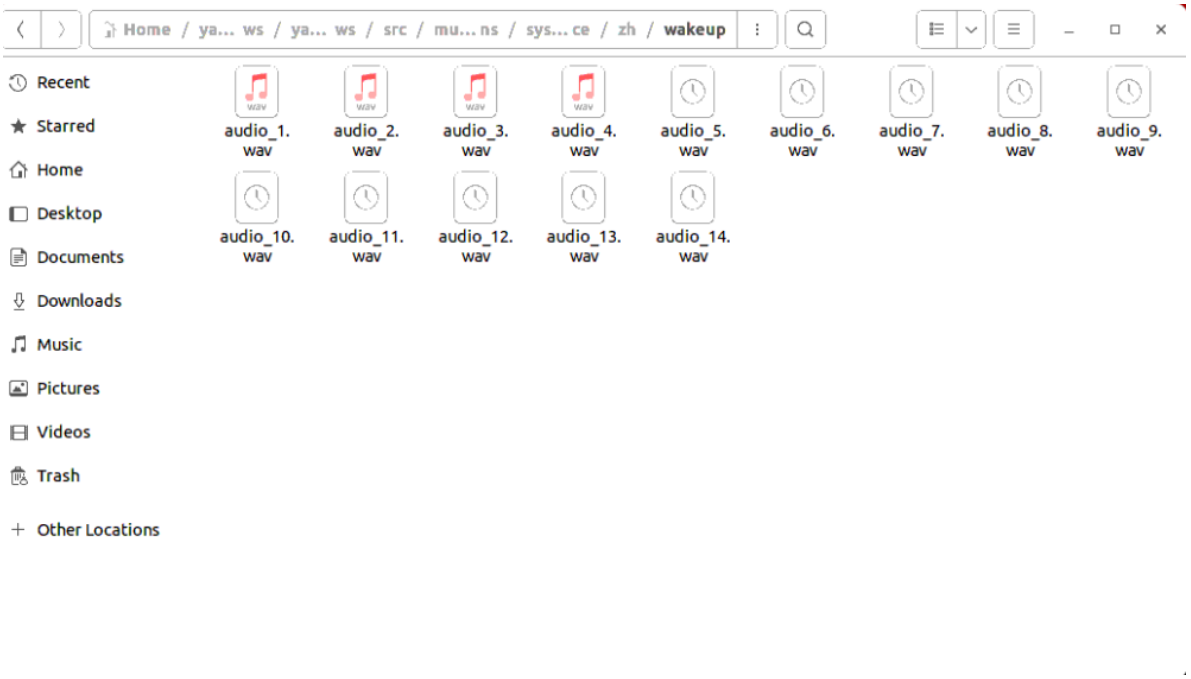

- The audio path of the multi_brains system:

```
~/yahboomcar_ros2_ws/yahboomcar_ws/src/multi_brains/system_vioce
```

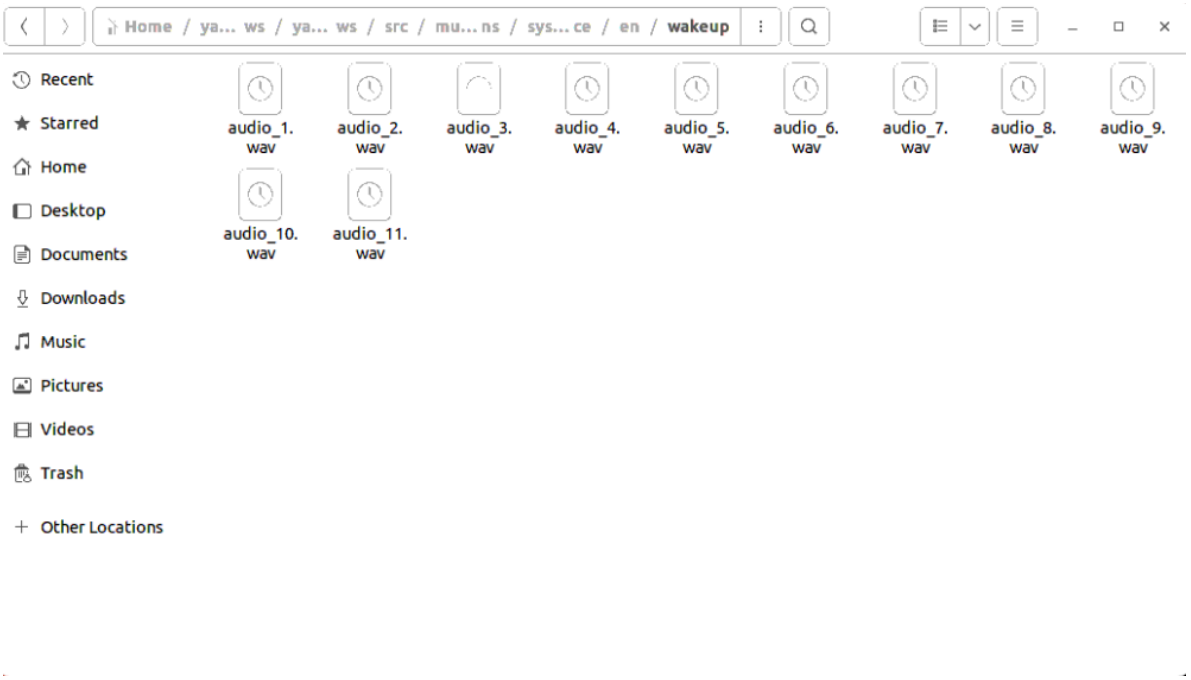

- Among them:
  - `zh` is the Chinese reply voice, suitable for domestic (China) users. Put the prepared audio files into the directory:

    ```
    ~/yahboomcar_ros2_ws/yahboomcar_ws/src/multi_brains/system_vioce/zh/wakeup
    ```

  - `en` is the English reply voice, suitable for international users. Put the prepared audio files into the directory:

    ```
    ~/yahboomcar_ros2_ws/yahboomcar_ws/src/multi_brains/system_vioce/en/wakeup
    ```

- After that, when the multi_brains program is started, the audio files in the corresponding directory will be automatically loaded, and a personalized reply voice will be played randomly when the user wakes up the robot.
